

TOROS Scale Items

(All items are rated on a scale from 1 to 7)

Section 1: Illegibility

- The robot's overall functioning is a mystery to me.
- It is hard to make sense of the robot's general functioning.
- It is difficult to get a clear picture of the robot's overall operations.
- I am confused about the robot's general objectives.
- I am unsure what the robot does.
- I cannot comprehend the robot's inner processes.
- I cannot explain the robot's behavior.
- It is impossible to know what the robot does.
- It is clear to me what the robot does.
- I have a clear understanding of how the robot operates in general.

Section 2: Explainability

- I feel like the robot's explanations are useful.
- The robot explains complex tasks in a way that is easy to understand.
- The robot provides detailed explanations of its actions.
- The robot provides clear explanations for its actions.
- The robot's explanations for its actions are straightforward.
- I feel informed about the robot's activities.
- The robot conveys its overall state effectively.

Section 3: Predictability

- It is easy for me to foresee the robot's future actions.
- The robot's behavior is predictable.
- I feel confident in predicting the robot's next moves.
- It is easy to anticipate what will follow the robot's behavior.
- It is difficult for me to tell what the robot will do next.
- The robot's next steps are clear to me.
- The robot's actions are obvious.
- The robot provides cues that help predict its next actions.
- The robot's behavior does not help predict what it will do next.
